IMPORTANT

POLICE, AGENCY SUITS

(Originally written on 12 September 1973, concerning suits which were filed against police and government agencies in Germany, in order to handle their spreading of false reports.)

1. Essentially this is a PR action and if made so it will also win. People hate police and are willing to believe almost anything bad about them. Therefore:

- a. You must not depend wholly on your already overloaded PR personnel. You must retain small PR firms to flank these suits in important places. A deal for special news and campaign handling of the local suit could be made. Retention should be a Church campaigning for the rights of the individual with a hot case to back it up, not dissemination of Scientology or its protection. This action must be at once *programmed with targets* so that these firms are actually retained.
- b. The basic public issue here is whether or not police can invent dossiers against individuals or groups and circulate them amongst themselves and to judges so that the human rights of the person or group are covertly destroyed. This is general modern police practice and even includes leaking these false reports to press as factual and inciting the media. This is a violation of the common law principle that a person must be faced by his accusers and that accusations must be known to him. This strikes at the integrity of a known corrupt police system.

- c. Frighten them into hysteria so they begin to make mistakes, become violent or even more oppressive or collapse. This is a marvelous PR condition around which very effective campaigns can be built, a PR man's dream. Hear this as a campaign: An ad in a paper, repeating, placed by our legal and so signed, which requests that anyone who has ever had a false police charge placed against him or who has reason to believe the police have or are using a false record to ruin his life should communicate with the attorneys. That gives you some idea of the PR potential.
- d. The police love to try people in the press and erode public opinion against them so that when the police strike the way is all prepared so that they can say they are after criminals. In this way and by false stats of crime and other means they build up their status and numbers and cover up the fact that they are themselves engaging in acts contrary to public safety. They are therefore peculiarly sensitive to any motivator in this area. It remains that police must be tried by us in the press on and on and on.
- e. Police are employed by self interest groups to get rid of their rivals. We have this in the National Association of Mental Health (NAMH). All one has to do is discover a friendship between NAMH and the police in any area (and these connections abound) to prove that self interest groups get rid of rivals by using false reports in the police.
- f. This must be built up PR-wise to a very broad public issue that affects every man, woman and child in a country and causes a very great deal of civil protest forcing the resignations of anyone who has been connected with such activities. The Germans are good at making people resign.
- g. German press laws are very loose and cases can be tried in the press without being sub judice.

- h. It is a stroke of luck that GERMAN, which to the world means NAZI, police are at the bottom of this. This extends to every other police force or agency named in the suit anywhere so they all become Fascists by association.
- i. PR should work hard to pull in any other group under attack or otherwise into this, “What police false reports are causing YOUR trouble?” is the motif. The demand is that police violently reform and quit doing this. Thetans will agree on stopping something. They will agree as groups in stopping the police. If this is backed up hard enough with enough groups there will not only be resignations but new laws passed to restrain this secret and insane practice of inventing dossiers to CAUSE public unrest rather than forward public safety.
- j. Police are a prime target in all revolts. It can be made plain to politicians that corrupt police are a threat to their regime and that public unrest can become so bad that they could be swept away. In any political circle today there is an abiding fear of the masses, of revolt. Almost any politician thinks about this today. If it is pointed out that their regime is being undermined by corrupt and illegal police practices they will call for resignations and pass laws. Thus there is a heavy lobby function to be undertaken and this must be provided for in all programming of PR.
- k. The danger of secret reports being circulated within a country is bad enough but look at the international scene. OVER 900 young Americans are in European prisons, put there because the FBI tipped off the foreign police to frame them or grab them. You will find in every case that an FBI finger was put on every one of these people and they do not even know it. In other words, they shoot their people overseas. And so does every other police force; and so does every other police force use false reports.
- l. The police have a kingdom of their own known as Interpol. It has no court above it. It deals in torrents of false reports. It has its own

radios around the world. It actually has no legal propriety whatever as it is under no sovereign, only under police forces. It has constituted itself a sovereign power. It manipulates events in the world by issuing false reports. It is the new Fascist regime. It should be disbanded and eradicated as a cancer hidden in and unknown to Mankind. Through it, police could take over the world and undoubtedly sometimes dream of it. The head of Interpol is an absolute dictator, a Hitler governed by no superior court. Anyone with that much power and that propensity for issuing false information would have no trouble whatever in constituting himself a world dictator. Any self interest group can use that power.

- m. We must emphasize that the inefficiency of the police makes them resort to falsifying records to maintain their own status and that falsifying records knowingly is their way of life. They use these to incite judges to issue wiretaps and to begin incursions on innocent people with whom they want to get even. The point is that they use a DOSSIER system today that is antipathetic to all civil rights and that they falsify records and abuse their power.

2. You have of course winning suits as a purpose here. I do not. I expect that as an incidental. My purpose here can be very clearly stated. This world cannot be sane so long as it has a Third Dynamic and Fourth Dynamic insanity called falsely reporting corrupt police running amok in it. All civilizations go criminal via their police. My purpose is to eradicate the power and authority of Fascist police everywhere before they are used to totally enslave this planet. My purpose and mission in this is to bring sanity to this planet. It cannot exist so long as self interest groups have ready to hand corrupt and unprincipled police forces and agencies. Thus they must be reformed and rapidly while there is still enough breathing space to do the job, not after some new Hitler has come to power.

THEREFORE THE COURSE OF THESE POLICE AND AGENCY SUITS MUST HEAVILY CONTAIN PR IN ITS HIGHEST PROFESSIONAL AND EXPERT FORM IN ORDER TO ACCOMPLISH OUR OWN MISSION ON THIS PLANET.

Our legal and any legal authority issued must keep in mind that we are not just suing police. We are making a saner planet.
